

CROP TREATMENT

MINI SPRAYER

200 or 300 Litres tank

IDEAS, DESARROLLO
Y MEJORA, S.L.
www.idm-agrometal.com

Efficient treatments:

- Homogeneous treatment.
- Small sized for reduced spaces.
- Costs saving.

Main features:

- Totally **homogeneous treatment**, from first to last plant, covering all its height.
- **Small sized**: designed to work in much **reduced spaces**.
- **Double-flow nozzles**. It allows selecting different flows depending on the application we want to make or even having different applications on different heights of the plant.
- Nozzle height and wide can be regulated according to the crop.
- **Operator safety**: Worker exposure to chemical reduced considerably.
- 200 or 300 litres tank.

Technical features:

- Independent engines for traction and spraying
- Very easy driving: accelerator and break pedals
- 2 speed gearbox: Forward and reverse progressive motion.
- Remover into the tank
- Two versions: Manual or automatic engines starter

Weight and measures:

- Total length: 190 cm.
- Total height: 169 cm.
- External body width: 58 - 69 cm.
- External width on wheels: 65 – 75 cm.
