Electrical driving, hydraulic lifting.

Design for pipe-rail heating system greenhouses.

Main features:

- Very easy to change from one pipe-rail to the other and to push along the main concrete path.
- Double hydraulic scissor lifting platform.
- Electronic speed control.
- Smooth acceleration and braking.
- Low center of gravity.
- Automatic battery charger included.
- Adaptable dimensions according each greenhouse needs.
- Aluminium anti-skid platform.

Engine:

- 0,5 CV and 24 v Gearmotor, permanent magnet.
- 0,8 CV and 24 v 100 bar hydro-electric switchboard.
- Double traction batteries: 12V 125 AH.

Weight and dimensions:

- Weight: 360 kg.
- Total length: 1700 mm.
- Chassis width: 570 mm.
- Platform lifting: 2950 mm.
- Max. working height: 4950 mm.
- Working platform dimensions: 1700x470 mm.
