SHELTERALL® INDUSTRY

The Shelterall®, with its modular metal-textile construction, meets your short- and long-term industrial storage needs.

It complies with Eurocode EN1990 standards used for designing traditional buildings, and offers a sustainable alternative to conventional modular constructions.

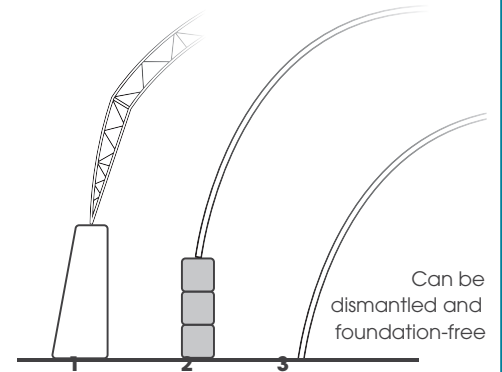

Our assembly teams will work safely on your sites in accordance with your prevention plan.

The Shelterall® is the optimal storage solution for your industrial products:

- On the ground: more than 2m of height less than 0.5m from the edge
- On racks: 100% usable capacity
- Bulk goods: unloading height up to 15m
- Maintenance workshop: enclosed and/or isolated (optional)

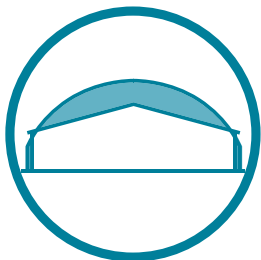

The Shelterall® is cost-effective to buy and is also available to rent.

Assembly options: steel partition (1) on (block/concrete) walls (2), on the ground (3)
Can be dismantled and foundation-free

The Shelterall range is available in width from 8 to 25 meters. (Wide range of options).
